COURSEWORK

UNDERGRADUATE
Data structure and Algorithms
Object Oriented Programming
Database Management System
Operating System

SKILLS

LANGUAGES
- C++
- Java
- Javascript
- SQL

TECHNOLOGIES/FRAMEWORKS
- Java SpringBoot
- Spring Data JPA
- React.JS
- Tailwind CSS
- Bootstrap
- HTML | CSS

DATABASES
- MySQL
- PostgreSQL
- MongoDB

TOOLS
- Eclipse | STS
- VS Code
- Git
- Postman

EXPERIENCE

INEURON.AI | Internship Trainee
July 2022 – June 2023 | **Certificate**

- Proficient in Java Technology with practical experience in applying Java concepts, including object-oriented programming.
- Developed scalable and efficient applications using the **Spring Boot** framework and implementing **microservice** architecture principles.
- Acquired a strong foundation in Java programming principles, including experience working with Java-based tools and frameworks such as**Eclipse, Maven, and Tomcat.**
- Gaining proficiency in key areas such as exception handling and database connectivity using **JDBC**.

PROJECTS

HOTEL RATING SERVICE | Source Code

- Created a microservice based backend application where user can able to give ratings to the hotels.
- Implemented different services like user,rating,hotel,service registry,api gateway,config server.
- Implemented features such as rate-limiter, retry and fault tolerance using the circuit bracker.
- Tools/Tech:- SpringBoot | Microservices | MySQL | PostgreSQL | MongoDB | Postman | Github

SMART CONTACT MANAGER | Source Code

- Designed and developed a web-based Smart Contact Manager application where users easily manage their contacts and profile information.
- Integrating features such as user authentication, contact search and payment processing.
- Implemented forgot password module that sends an OTP to the user's email for password reset.
- Tools/Tech:- Java SpringBoot | Spring Security | Thymeleaf | Bootstrap | Razor Pay | MySQL

KARKAUSHAL | Source Code | Live

- Created a web-based Ecommerce platform where artisans can sell their products and manage customer's orders.
- Implemented features such as user authentication, add/remove product from Cart, payment processing with expiration timer of 1 minute and Handling Concurrency.
- I created an UI part of the application using React.JS library.
- Tools/Tech:- React.JS | React-Bootstrap | Redux | MongoDB
